This kit includes a 120L adhesive container, air and vacuum tubing, a suction wand and a quick disconnect coupler and connector necessary to create a water wash adhesive container system for Fulfill and Fulfill retrofit melters.

**WARNING:** Risk of personal injury or equipment damage! Refer to the safety information provided in the melter manual before servicing the melter. Failure to comply with the safety information provided can result in personal injury, including death.

**Required Tools:**
- Flat head screwdriver

### Wand Assembly and Installation

1. Open the adhesive container. Remove the cap from the wand holding tube.

2. Assemble the wand (A), air tubing (B), vacuum hose (C) and hose clamp (D) as shown.

3. Attach the wand to the container by installing the vacuum hose and air tubing to the container outlet as shown.

4. Replace the cap onto the wand holding tube.
Install the Container to the Fulfill Melter

1. To connect the air tubing, firmly push the socket onto the plug until you hear a click.

Note: To disconnect the air tubing, push the sleeve toward the plug tip. Do not pull the sleeve back.

2. Connect the other end of the air tubing to the solenoid outlet.

3. Connect the vacuum tubing to the adhesive container and to the Fulfill assembly.

4. Secure the air tubing to the vacuum hose using the tie wraps provided.

5. Resume normal operation.
