Fulfill ® Retrofit and Integrated Power Supply - P/N 1100650

Follow these instructions to replace a power supply on a Fulfill Integrated and Retrofit melter.

1. Disconnect and lock out power to the melter.

2. Retrofit melters: Remove the 4 screws that secure the cover of the control box. Integrated melters: remove the top 2 hose gun modules, and then open the electrical enclosure.

3. Retrofit melters: Loosen the 4 screws that secure the plastic shield over the power supply, and then remove the shield.

4. Disconnect the electrical connections at the top and bottom of the power supply.

5. Remove the four screws that secure the power supply to its mounting plate, and then remove the power supply.

6. Replace the power supply, and secure it by reversing steps 2-4.

7. Resume normal operation.

WARNING: Risk of personal injury or equipment damage! Refer to the safety information provided in the melter manual before servicing the melter. Failure to comply with the safety information provided can result in personal injury, including death.

Required Tools:
- M2.5 Allen wrench
- Phillips screwdriver
