Control Box Assembly - P/N 1123385

Follow the instructions to replace a Control Box on a Fulfill® Retrofit melter.

**WARNING:** Risk of personal injury or equipment damage! Refer to the safety information provided in the melter manual before servicing the melter. Failure to comply with the safety information provided can result in personal injury, including death.

**Required Tools:**
* Phillips and flathead screw drivers
* 8mm wrench

1. Disconnect and lockout power to the control box.

2. Loosen the 2 knob screws (3) and remove the control box from the bracket (2).

3. Using an 8mm wrench, remove the 4 M8 bolts (5) securing the control box to the mounting plate (4).

4. Using a Phillips screw driver, remove the top of the control box (1), then remove the power supply cord, solenoid harness and, if applicable, the lid switch wire.

5. On the new control box, using a Phillips screw driver, remove the top of the control box (1), then connect the power supply cord, solenoid harness and, if applicable, the lid switch wire.

6. Secure the control box onto the mounting plate using the 4 M8 bolts.

7. Place the control box onto the bracket (2), securing it in place with the 2 knob screws (3).

8. Resume normal operation.

**Note:** ProBlue bracket shown.
