The Fulfill® Retrofit system improves productivity by automatically transferring solid adhesive stored in an adhesive bin to the melter on an as needed basis.

**WARNING:** Risk of personal injury or equipment damage! Refer to the safety information provided in the melter manual before servicing the melter. Failure to comply with the safety information provided can result in personal injury, including death.

**Required Tools:**
- M3 Allen Wrench
- M4 Allen Wrench
- Phillips Screw Driver

1. Purge the tank, then de-energize the system as directed in the Maintenance section of the melter manual. Make sure to remove all dirt and debris from the melter. When done, remove the old lid.

2. Attach the lid hinge to the front end of the melter using three M5 socket head screws provided in the ship with kit.

3. Place the new Fulfill lid on top of the melter as shown.

4. Secure the new Fulfill lid to the Lid Hinge using the M5 shoulder screws.

5. Secure the Lid Hinge Cover using the M5 shoulder screws as shown. When done, insert the screw caps.

**Note:** If you have the original gray ProBlue fill hose, refer to included Hose Cuff and Retaining Ring Replacement instruction sheet.
