Follow these instructions for retrofitting the universal lid assembly onto your melter.

WARNING: Risk of personal injury or equipment damage! Refer to the safety information provided in the melter manual before servicing the melter. Failure to comply with the safety information provided can result in personal injury, including death.

Required Tools:
- M4 Allen wrench
- Drill

1. Purge the tank, then de-energize the system as directed in the Maintenance section of the melter manual. Make sure to remove all dirt and debris from the melter.

2. Do the following:
   * Disconnect any electrical and hose connections.
   * Loosen and remove the screws holding the sensor in place.
   * Remove the lid assembly from the existing universal lid (2).

3. Install and secure the new lid assembly (1) with the M5x10 (3) screws.

4. Attach the ground connections.
5. Connect the wire from the junction box to the control box, then connect the hose.

**Note:** If you have the original gray ProBlue® fill hose, refer to included **Hose Cuff and Retaining Ring Replacement** instruction sheet.

6. Resume normal operation.
