## **TECHNICAL DATA SHEET**

**Nordson Cleaner C NF. Industrial cleanser, specially developed for cleaning of adhesives equipment, based on very high quality low aromatic petroleum distillates and natural solvents.**

### **General Description**

Nordson Cleaner C NF is a human friendly cleaner. Nordson Cleaner C NF has been specially developed for the cleansing of both hotmelt machinery and cold adhesives equipment, as well as their surrounding areas that are polluted with adhesives. Because of the very low aromatics this product is safe to use!

### **The Problems**

- Adhesives equipment becomes externally polluted with adhesives residues.
- Machinery, parts, conveyor belts, chains, floors etc become polluted with adhesives residues.
- Cleaning by using 1,1,1,-trichloroethene or other volatile substances is a hazardous job under unhealthy and environmentally damaging working conditions.
- Poorly cleaned adhesives and peripheral equipment can cause loss of production.
- The use of a pleasant smelling, safe cleaning product increases staff motivation and leads to better performance.
- Cleaning adhesives equipment is often done by qualified staff, which is expensive.

### **The Answer**

Nordson Cleaner C NF is the answer to all the problems mentioned above. Nordson Cleaner C NF provides a safe answer to cleaning adhesives equipment: Nordson Cleaner C NF is the safe substitute for trichloroethane, thinners etc. When adhesives and peripheral equipment are being cleaned well, this will result in less interruptions and less loss of production. Cleaning by using Nordson Cleaner C NF gives such results that the job becomes a pleasant experience.

## Special Features

- Nordson Cleaner C NF is low aromatic (<0,03%)
- Nordson Cleaner C NF has a neutral odour
- Nordson Cleaner C NF is safe and pleasant to use
- Nordson Cleaner C NF does not contain any chlorinated hydrocarbons, such as methylene chloride, 1.1.1., trichloroethane etc
- Nordson Cleaner C NF has excellent cleansing qualities
- Nordson Cleaner C NF is friendly for man, the environment and materials
- Nordson Cleaner C NF can be emulsified in water

## Typical Applications

- External surfaces of adhesives equipment and their surrounding areas
- Floors, walls and tools contaminated with adhesives residues
- Cleaning adhesives and peripheral equipment parts during overhaul and repairs
- In short: anything polluted with adhesives residues

## Remarks

Do not spray in a naked flame and keep away from sources of ignition. Test first when used for the cleaning of synthetic materials.

## Method of use

Nordson Cleaner C NF should always be used purely. Nordson Cleaner C NF can be used by spraying or by immersion.

- Spraying: Spray Nordson Cleaner C NF directly onto the object that is to be cleaned. Leave to penetrate for some time. After that, wipe off using a cloth, brush or spray off with water under high pressure.
- Immersion: Immerse the object in Nordson Cleaner C NF. Leave to penetrate for some time. Take out and let the object drip; then rinse with water. It is also possible to use a flush-immersion machine.

## Packing

Nordson Benelux sprayers are made of PET: light weight, little raw material per bottle, low production energy consumption, virtually unbreakable and therefore long life, little waste during production and recycling, no harmful substances when incinerated, 100% recyclable.
