TECHNICAL DATA SHEET

Nordson Cleaner C Odorless. A safe industrial cleaner based on a natural solvent, emulsifiers and aromatics-free synthetic hydrocarbons for the cleaning of adhesive equipment.

General Description

Nordson Cleaner C Odorless is an extremely user-friendly cleaner. It is safe to use due to a unique combination of natural raw materials and synthetic hydrocarbons. Nordson Cleaner C Odorless has an excellent solvent action for the removal of both hot melt and cold glue!

The Problems

- Adhesives equipment becomes externally polluted with adhesives residues.
- Machinery, parts, conveyor belts, chains, floors etc become polluted with adhesives residues.
- Cleaning by using 1,1,1,-trichloroethene or other volatile substances is a hazardous job under unhealthy and environmentally damaging working conditions.
- Poorly cleaned adhesives and peripheral equipment can cause loss of production.
- The use of a pleasant smelling, safe cleaning product increases staff motivation and leads to better performance.
- Cleaning adhesives equipment is often done by qualified staff, which is expensive.

The Answer

Nordson Cleaner C Odorless is the answer to all the problems mentioned above. Nordson Cleaner C Odorless provides a safe answer to cleaning adhesives equipment: Nordson Cleaner C Odorless is the safe substitute for trichloroethane, thinners etc. When adhesives and peripheral equipment are being cleaned well, this will result in less interruptions and less loss of production. Cleaning by using Nordson Cleaner C Odorless gives such results that the job becomes a pleasant experience.

Special Features

- Nordson Cleaner C Odorless is aromatics-free
- Nordson Cleaner C Odorless is pleasant and safe to use
- Nordson Cleaner C Odorless does not contain chlorinated hydrocarbons, such as methylene chloride, 1,1,1-trichloroethane, etc
- Nordson Cleaner C Odorless has a superb degreasing effect and can be rinsed off with water.
- Nordson Cleaner C Odorless is user-friendly and material-friendly
- Nordson Cleaner C Odorless is safe to use on all metals and most plastics
- Nordson Cleaner C Odorless has a high flashpoint
- Nordson Cleaner C Odorless contains emulsifiers, which makes it possible to mix the cleaner with water (temporarily), but this in particular makes it easier to rinse off the cleaner.

Typical Applications

- External surfaces of adhesives equipment and their surrounding areas
- Floors, walls and tools contaminated with adhesives residues
- Cleaning adhesives and peripheral equipment parts during overhaul and repairs
- In short: anything polluted with adhesives residues

Remarks

Do not spray in a naked flame and keep away from sources of ignition. Test first when used for the cleaning of synthetic materials.

Method of use

Nordson Cleaner C Odorless should always be used purely. Nordson Cleaner C Odorless can be used by spraying or by immersion.

- Spraying: Spray Nordson Cleaner C Odorless directly onto the object that is to be cleaned. Leave to penetrate for some time. After that, wipe off using a cloth, brush or spray off with water under high pressure.
- Immersion: Immerse the object in Nordson Cleaner C Odorless. Leave to penetrate for some time. Take out and let the object drip; then rinse with water. It is also possible to use a flush-immersion machine.

Packing

Nordson Benelux sprayers are made of PET: light weight, little raw material per bottle, low production energy consumption, virtually unbreakable and therefore long life, little waste during production and recycling, no harmful substances when incinerated, 100% recyclable.
